

datmo::cloud\_segmentation

```
graph BT; Velodyne --> datmo; ZR300 --> datmo;
```

The diagram illustrates a data flow or dependency. At the bottom, there are two rectangular boxes: 'Velodyne' on the left and 'ZR300' on the right. From the top-right corner of the 'Velodyne' box, a horizontal line extends to the right, and from the top-left corner of the 'ZR300' box, a horizontal line extends to the left. These two lines meet in the center, and from that junction, a vertical line with an upward-pointing arrowhead leads to the bottom center of a third, larger rectangular box at the top. This top box is labeled 'datmo::cloud\_segmentation'.

Velodyne
